

**Unregistered patients requiring a Yellow Fever Vaccination**

The surgery will need the date of travel before making you an appointment. The appointment should **ideally be 1 month before travel**, for the greatest personal immunity.

The certificate of immunity is only valid if the vaccination was administered at least 10 days prior to travel. Therefore your vaccination needs to be **more than 10 days before the date you travel**.

There is a **£60 fee** for the Yellow Fever Vaccination, this can be paid either by cash or a cheque made payable to CCA Care Partnership. You will also need to bring your passport along to your appointment with the nurse as the details will be needed for your certificate.

It is important that you have **completed a temporary registration form** as you will need to be electronically registered on our system as a private patient.

Please see the information booklet attached regarding further necessary information regarding the Yellow Fever Vaccine.

Thank you.
